“Wasana mutti” a traditional sri lankan game where a person is blindfolded and given a stick, and whoever breaks the pot will win – photo taken during 2023 corporate new year celebration

# Why Treinetic?

Choose Treinetic as your software product engineering partner and start a journey from concept to full-scale development. Our team, combining deep technical knowledge with innovative thinking, has been delivering success for nearly a decade. We turn your ideas into outstanding projects that not only meet but exceed your expectations. Our approach is client-focused, agile, and transparent, ensuring robust, scalable solutions tailored to your needs. With a globally renowned team known for technical expertise and creative problem-solving, we promise not only exceptional outcomes but also an engaging and collaborative experience. Partner with us to transform your vision into reality with a team that's as committed as it is dynamic

- Deep Technical Expertise
- Friendly and Dedicated
- Innovation at Core
- Proven Track Record
- Client-Centric Approach
- Quality Assurance
- Agile and Adaptive
- Scalable Solutions

# Our Culture

## Journey Through Unforgettable Moments

# Our Team

04

**Imal Perera**

CEO

Imal, an industry trailblazer with over a decade of product engineering expertise, holds numerous awards and certifications. His leadership extends beyond innovation to exceptional customer service, underpinning Treinetic's exponential growth. Imal's vision ensures that Treinetic not only leads in technology but also in customer satisfaction.

**Gihan Wijesinghe**

Director, Innovations

Gihan, with his expertise and over a decade of hands-on experience in technology, has been pivotal to Treinetic's innovation, particularly in blockchain development. As a certified blockchain solution architect, his exceptional leadership in team management and vision execution has significantly propelled Treinetic's success in the tech landscape.

**Nuwantha Fernando**

Lead Operations

Nuwantha, excels in optimizing workflows and enhancing team productivity. With a keen eye for efficiency and a knack for strategic planning, he ensures the seamless execution of projects. His leadership is pivotal in maintaining Treinetic's reputation for operational excellence and innovation.

**Anton Dias**

Lead Tech

Anton, spearheads technological strategy and development with unmatched expertise. Holding an MSc in Technology, his vision for the future drives the company's innovation, blending cutting-edge technologies with practical solutions. Anton's leadership ensures Treinetic remains at the forefront of industry advancements.

# Services We Offer

As a premier software product engineering firm, we excel in the art and science of transforming concepts into tangible software products. Software Product Engineering, at its core, encompasses the meticulous process of ideation, design, development, testing, and delivery. Our strategic approach is integral to managing the entire product lifecycle, commencing with the innovation phase and extending through deployment and user acceptance testing. Discover the comprehensive range of product engineering services we provide on the following page.

# Services We Offer

## Web Application Development

Our team specializes in engineering high-quality web applications using the latest frontend frameworks. By prioritizing elegant design and leveraging our proven engineering expertise from the start, we ensure our products excel in compatibility and user experience. This strategic approach allows us to deliver solutions that are not only technically robust but also intuitively designed for maximum usability.

## Mobile Application Development

In our tech-centric world, our mobile engineering team offers essential expertise. With a track record spanning native iOS and Android apps to hybrid solutions, we tailor-make mobile applications to suit your vision. Our experience guarantees precise alignment with user needs and market trends.

## Cloud Strategy

Our seasoned team excels in designing and implementing cloud architectures tailored to your product's needs, ensuring peak performance at optimal costs. Whether it's optimizing current systems, developing cloud-native applications, or navigating the transition to a new cloud infrastructure, Treinetic is your expert partner. Let us guide you through leveraging cloud technology to its fullest potential.

## UI / UX Design

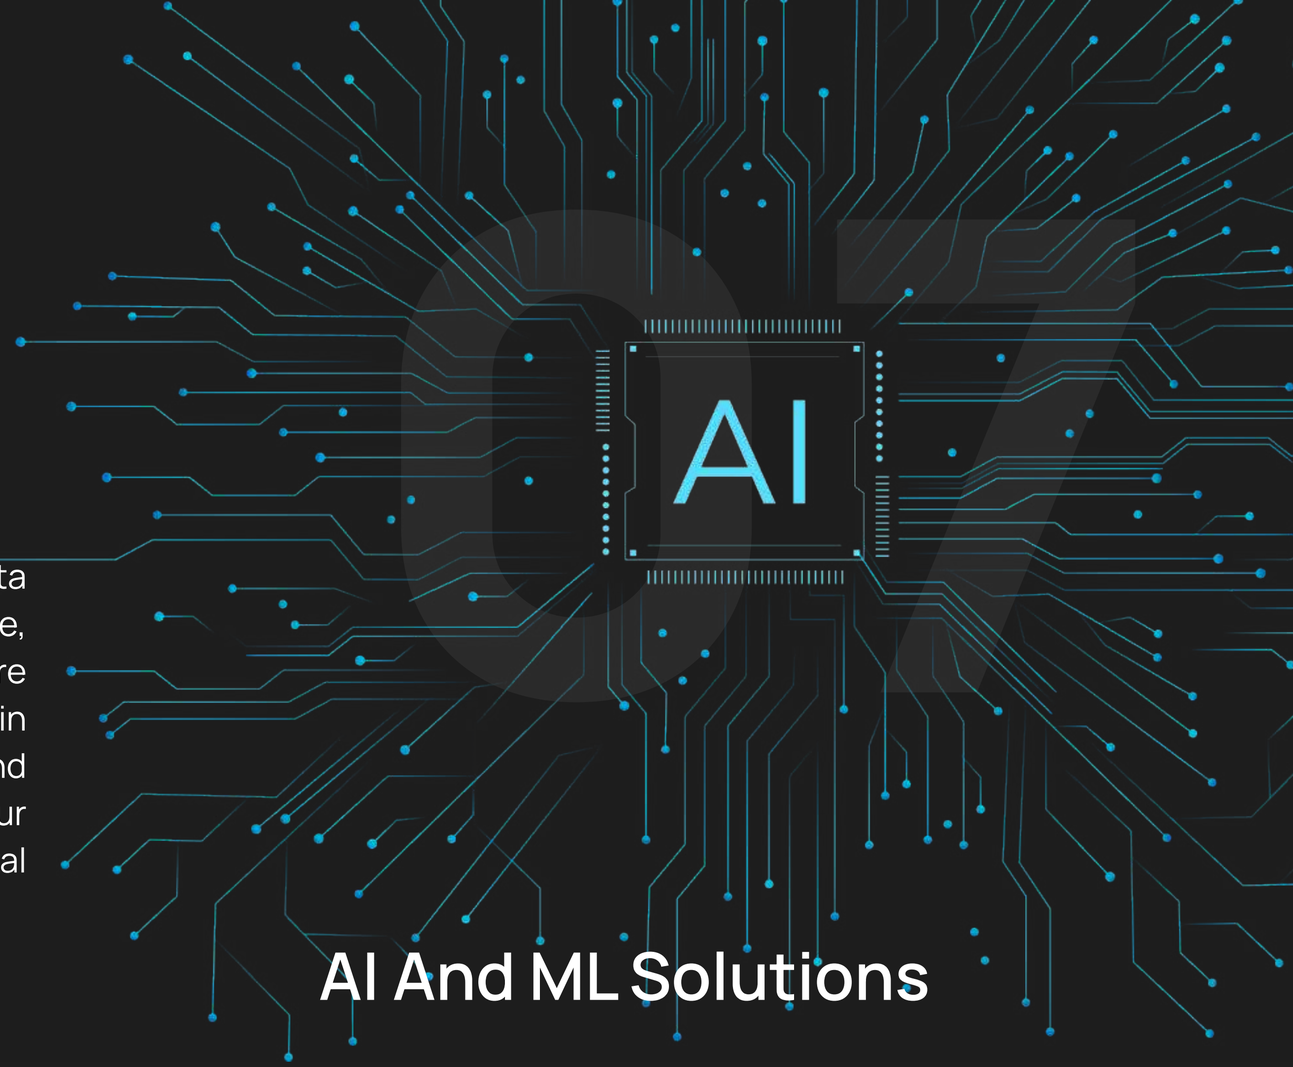

UI/UX design is pivotal in bringing ideas to life while optimizing for usability and interactivity. Trust in our UI/UX experts to craft solutions that are not only visually striking but also intuitively functional. We're committed to a collaborative, iterative design process, ensuring your complete satisfaction with the final product. Let's create experiences that resonate deeply with your users

# Future Tech

## Blockchain Solutions

In response to growing concerns over centralization, censorship, and data security within the tech industry, the demand for decentralized, immutable, and secure software systems has never been higher. At Treinetic, we are dedicated to exploring and implementing cutting-edge blockchain technologies. Our focus is on identifying compelling use cases and architectural solutions that leverage the power of blockchain to meet our clients' needs, offering them unparalleled security and integrity in their digital transactions

## AI And ML Solutions

As the digital landscape evolves, so does the complexity of data and the need for sophisticated analysis methods. This transformation underscores the critical demand for advanced machine learning solutions that can interpret, predict, and make informed decisions based on vast datasets. At Treinetic, we are at the forefront of harnessing machine learning technologies to unlock actionable insights and automate complex processes for our clients. Our commitment lies in developing intelligent systems that are not only predictive but also adaptive, ensuring our clients stay ahead in a data-driven world.

# Our QA Process

Software inevitably faces defects, underscoring the need for a rigorous Quality Assurance (QA) process aimed at delivering a flawless user experience. At Treinetic, we understand that QA transcends mere phases within the Software Development Life Cycle (SDLC); it's a persistent endeavor that starts from project inception and extends through to completion and ongoing maintenance. Our approach initiates QA at the requirements stage, proactively identifying and resolving potential issues before development begins, emphasizing prevention over correction. Post-project, our lead QA engineer compiles a Lessons Learned Report (LLR), documenting encountered challenges and solutions, thereby refining our process for future projects. This commitment ensures not only compliance with client specifications but the creation of products of the highest quality

09

# Our Success Stories

# Viditure Inc.

## USA

**“Secure Digital Signatures for Your Business”**

Treinetic partnered with Viditure Inc. to build Weleta, a cross-platform solution that simplifies digital document signing. Key features include drag-and-drop document editing, secure video and e-signatures, team collaboration, and multi-language support.

With flexible subscription plans, secure payments via Chapa, and real-time notifications using Twilio and SNS, Weleta offers a fast, secure, and user-friendly way to manage and sign documents digitally.

# Complete Unity INC

## USA

Our client wanted to build a social network for the Christian community. This enables people to Sign-up, log in, build a friend base, and then communicate with each other, send follower requests, create groups, host events, share posts, and respond to the posts like all other social networks. And also, it enables users to react and share content, etc.
This Is a project in progress and our team is only focused on the mobile application.

# Embassy Of Ethiopia

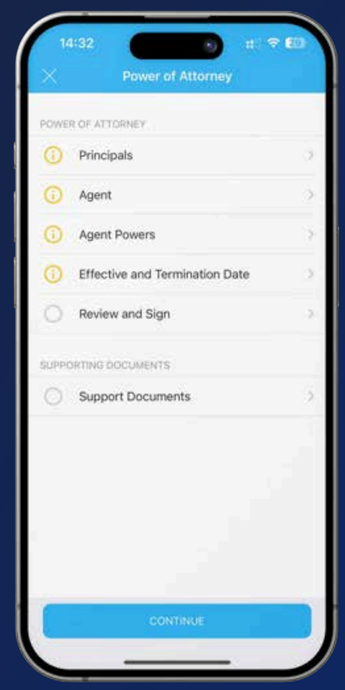

## Washington, D.C

Our client wanted to take the creation of the power of attorney process online, which means anyone living in the USA who is also an Ethiopian citizen should easily create the power of attorney document and get approval through the government by verifying their identity.

This was a challenging project as many variables were unknown at that time, however, our team was able to provide a satisfactory product.

**Project Name :**

Digital Mofa

**Project Duration :**

# MD Gunasena

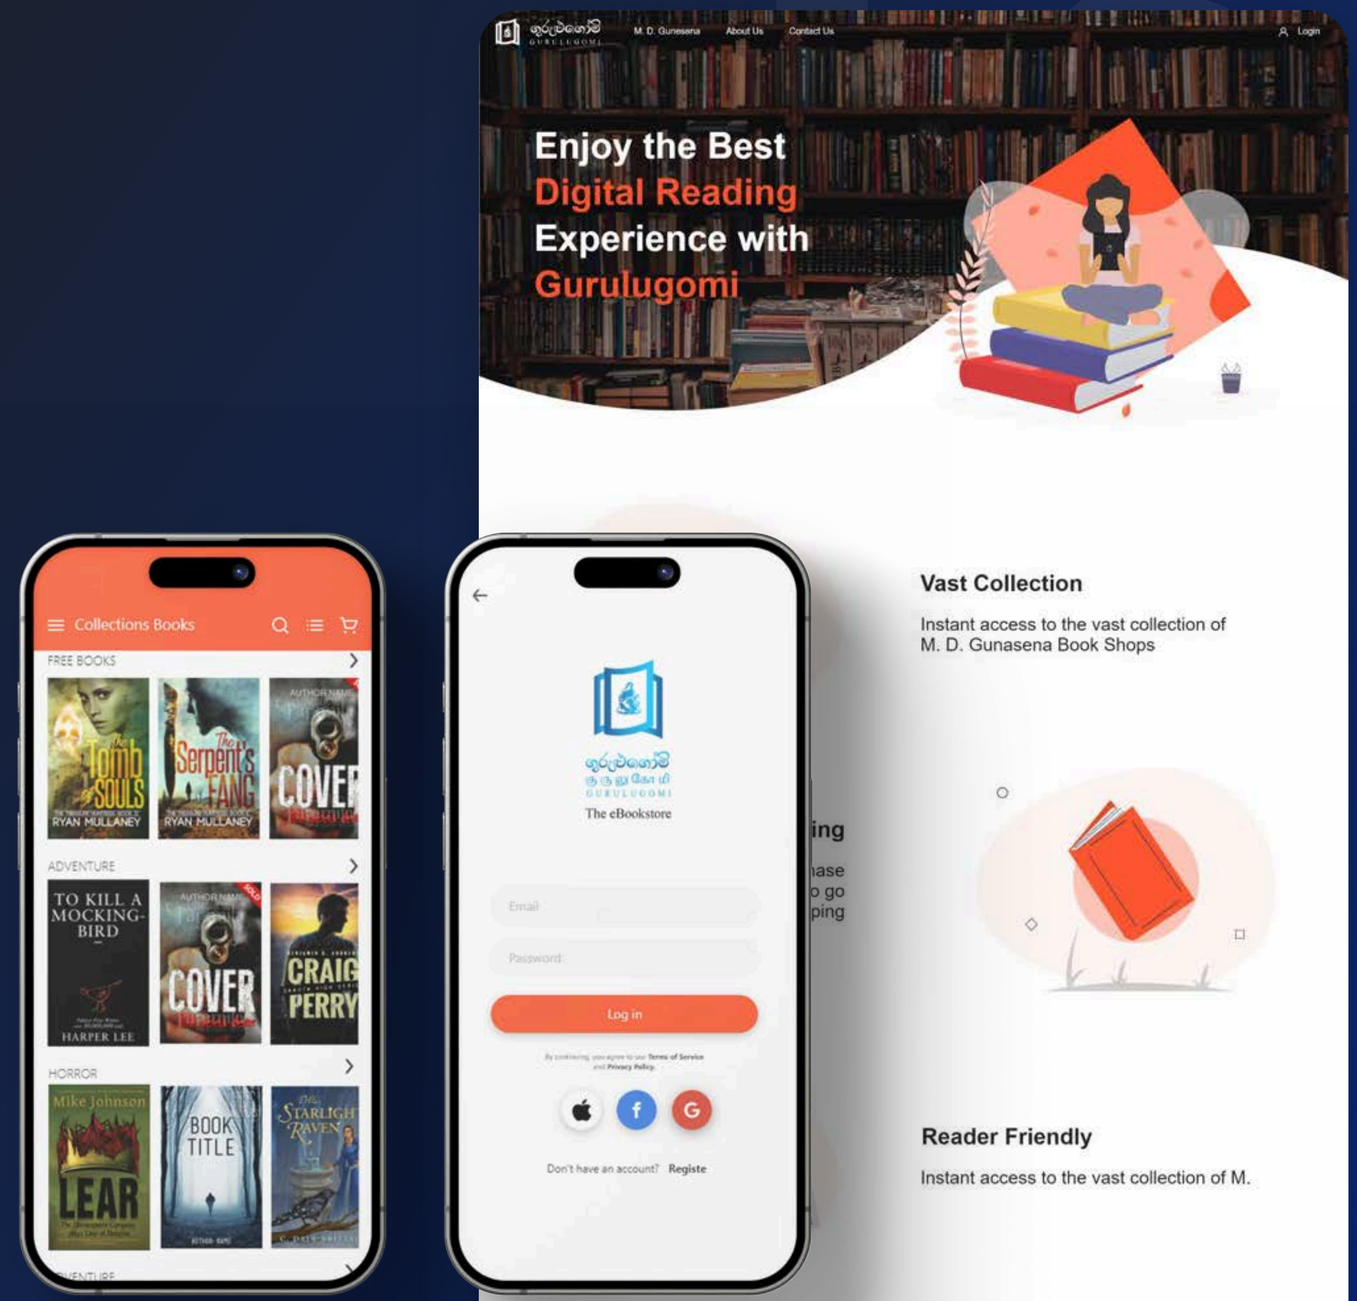

## Sri Lanka

Just before the pandemic, MD Gunasena reached us with an idea to build an eReading platform, they wanted to take all of their books to the cloud and let people purchase the eBook version of it.
As the product engineering company, we proposed a system where people can purchase using Android, iOS and then read from the device itself, project required a lot of study on DRM systems as their books need to transfer to the users with high security and should have a very less possibility of hacking and extracting them.

**Project Name :**
Gurulugomi

**Project Duration :**
7 Months

# Muallemi

## QATAR

**“Empowering Education Through Innovation”**

Muallemi is an EdTech platform designed to improve STEM education for students in Grades 2–12 through personalized, affordable digital learning. Addressing key challenges in Qatar’s education system, such as high tutoring costs and poor global rankings. Muallemi has achieved a 12% average improvement in student scores and 93% session satisfaction. Developed in partnership with Treinetic, the platform combines advanced features, scalability, and user-centric design to deliver impactful educational outcomes.

**Project Name :**

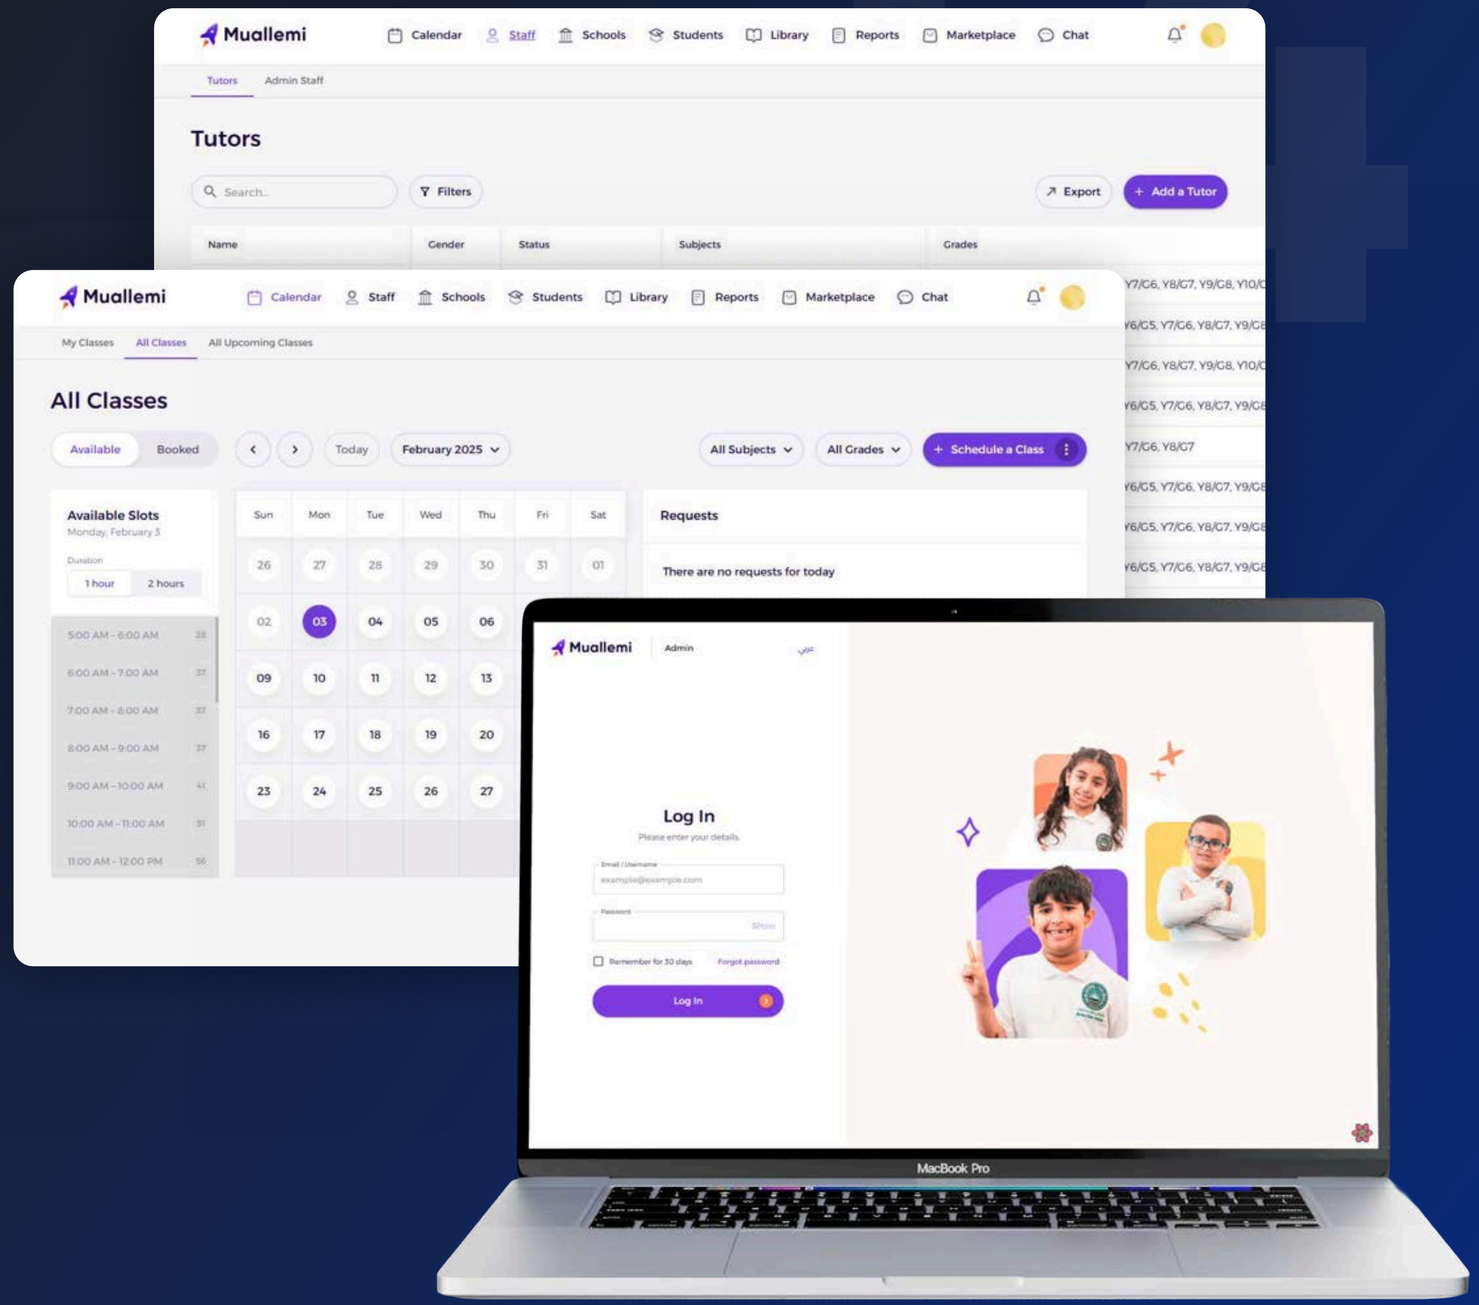

Muallemi

**Project Duration :**

Continuous

# Oneiro

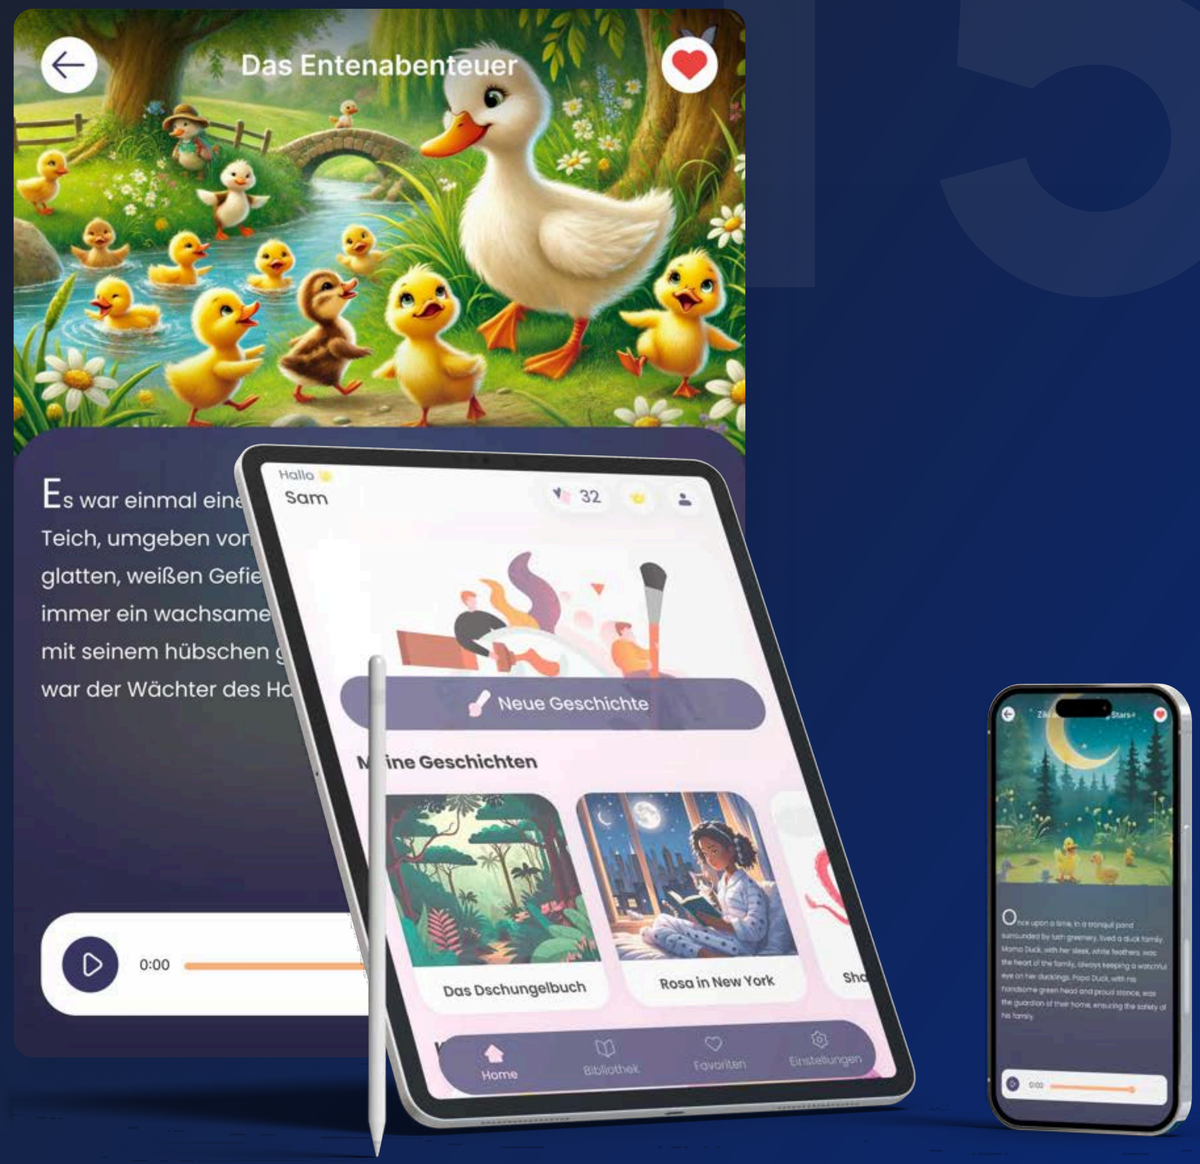

15

## GERMANY

**“An AI-Powered Storytelling App to Ignite Children’s Imagination”**

Oneiro is a smart storytelling platform developed to inspire and educate children through personalized, AI-generated adventures. The app delivers engaging stories that adapt to each child’s preferences, promoting creativity, emotional intelligence, and cognitive development.

The goal was to create a meaningful alternative to passive screen time by offering interactive and age-appropriate content. With a user-friendly interface and dynamic story experiences, Oneiro redefines how children explore, imagine, and grow through storytelling.

**Project Name :**

Oneiro

**Project Duration :**

4 months

# Central Environmental Authority

## SRI LANKA

**“A National Platform for Real-Time Air Quality Monitoring and Analysis”**

Treinetic partnered with the Central Environmental Authority (CEA) of Sri Lanka to build a powerful digital platform that tracks and visualizes real-time air quality data across the country. The system monitors pollutants like PM2.5, PM10, $O_3$, CO, $NO_2$, $SO_2$, VOCs, and $CO_2$—empowering both citizens and officials to make data-driven decisions.

Designed as a Progressive Web App (PWA), the platform ensures accessibility on any device. Key features include an interactive map with live AQI updates, filtering by region and time, and advanced trend analysis tools. An admin panel supports data control, user management, and report generation—making it a vital tool for national environmental governance.

**Project Name :**

Air Quality Monitoring System

**Project Duration :**

Ongoing

# Foodie Bell

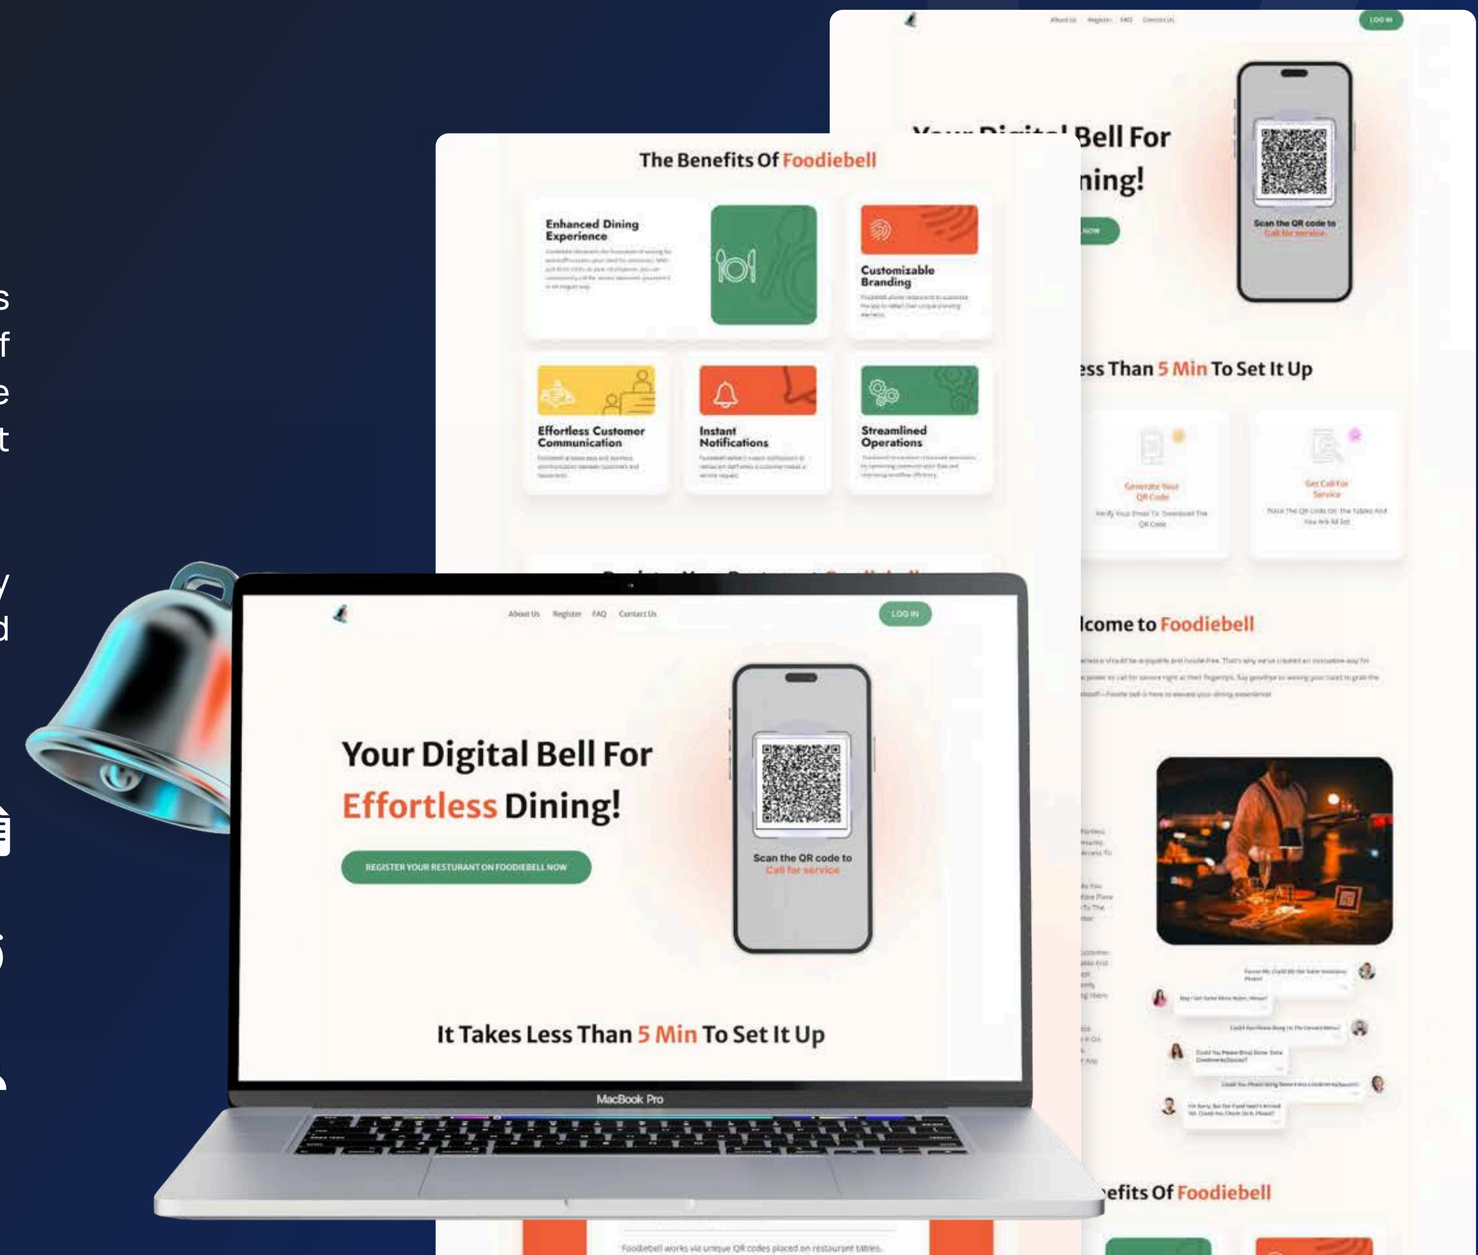

17

## UAE

**“Redefining Dining Experiences with Technology”**

Treinetic developed a digital platform for that removes communication gaps between diners and restaurant staff through QR code ordering and real-time chat. The Progressive Web App (PWA) works on all devices without installation, offering convenience and ease of use.

The platform helps restaurants manage orders efficiently with customizable features, improving service quality and customer satisfaction while streamlining operations.

**Project Name :**

Foodie Bell

**Project Duration :**

4 Months

# Securities And Exchange Commission

## SRI LANKA

**“Revolutionizing Regulation with CoreWatch”**

CoreWatch is a next-generation SupTech platform developed by Treinetic for its client, the Securities and Exchange Commission (SEC), to strengthen market conduct supervision in Sri Lanka. Designed to meet the SEC’s regulatory needs, CoreWatch delivers a comprehensive solution for onsite and offsite supervision, correspondence and case management, digital signature workflows, automated licensing processes, and dashboard and report management. By integrating real-time analytics, risk-based workflows, and secure compliance features, CoreWatch enhances transparency, operational efficiency, and regulatory effectiveness. Trusted for its intuitive design and powerful functionality, CoreWatch sets a new benchmark in supervisory technology.

**Project Name :**

CoreWatch

**Project Duration :**

Continuous

**Team Size :**

# Engagement Models

Treinetic recognises the diversity in customer preferences for software development pricing models. To accommodate this variety and maintain our commitment to flexibility and client-centric service, we offer several engagement models.

## Fixed-Priced Model

The fixed-price model, ideal for projects with well-defined scopes and requirements, offers budget certainty for small to medium, long-term projects, ensuring clear timelines and specifications are met with value-driven results

## Time And Materials

The Time and Materials (T&M) model offers flexibility, billing for actual time and materials, allowing for real-time adjustments. It's ideal for projects requiring adaptability, ensuring outcomes align with evolving needs and objectives.

## Dedicated Teams

Our Dedicated Teams model offers a blend of flexibility, scalability, and agility, acting as an extension of your in-house team. Hand-picked to match your goals, they propel your business forward while we align with your exact requirements.

# Our Process 2.0

A well-defined development process enables us to deliver stable products more quickly and with minimal to no defects, ensuring efficiency and high quality in every project.

REQUIREMENTS GATHERING | PLANNING AND SCOPING | DESIGN & ARCHITECTURE | DEVELOPMENT | INTERACTIVE DEVELOPMENT | TECHNICAL SUPPORT

“Our clients are always active participants in the project development lifecycle,  controlling the progress and having an opportunity to introduce changes at  any time. Consequently, we guarantee the high quality of the end product and  the quality of our services by fostering process transparency”

- Sarin Wickramasinghe-

# Treinetic

Treinetic excels in software product engineering, serving the B2C and B2B sectors across Sri Lanka, the United States, Europe, and Australia. Our commitment to quality and extensive international experience positions us for global expansion. Clients appreciate our adaptability and the high standards we maintain throughout the product lifecycle. At Treinetic, we blend technological proficiency with passion, upholding internationally recognized standards and best practices. Our team's expertise ensures that we deliver exceptional products, reflecting our dedication to innovation and quality.
